WORK EXPERIENCE

Hillcroft Technologies | mTek services

Nairobi, Westlands

Software Engineer

May 2021 - Present

- Developed and deployed new features on the Admin web application using Angular, resulting in a 20% increase in user engagement metrics.
- Implemented automated unit testing for admin portal codebase, resulting in a 40% reduction in bugs and errors identified during development phase, ultimately improving overall code quality.
- Trained team members on best practices for writing effective unit tests, leading to a 50% increase in test coverage across the admin portal codebase.
- Collaborated with cross-functional teams to identify customer pain points and develop solutions within web applications, resulting in a 10% increase in customer satisfaction ratings.
- Collaborated with marketing and sales teams to implement customized solutions for each partner's unique needs, resulting in a 30% increase in customer satisfaction ratings.
- Developed and implemented a comprehensive training program for team members on utilizing React and Angular frameworks, resulting in a 20% increase in project efficiency.
- Maintained and updated the data dashboard to meet evolving business needs, leading to a 10% improvement in data visualization accuracy and a 5% increase in overall user satisfaction ratings.
- Spearheaded the creation of cutting-edge web applications for insurance products, including motor, medical, travel, SMEs, and personal accident coverage, resulting in a 20% increase in user engagement metrics.
- Utilized Git version control system to track code changes and collaborate with team members, reducing errors by 15% and improving overall code quality.
- Utilized object-oriented design principles to enhance the performance of software applications, leading to a 15% increase in overall system efficiency.
- Collaborated with cross-functional teams to optimize software design processes, achieving a streamlined development timeline that reduced project delivery times by 25%, ultimately leading to an increase in customer satisfaction ratings by 15%.

Ladybird Softech Co

Nairobi

Junior Software Developer

Jan 2020 - Jan 2021

- Collaborated with IT team to integrate new features such as online grade portals and student attendance tracking into the school management system, resulting in a 30% increase in user engagement.
- Collaborated with senior developers to refactor existing codebase to improve testability, resulting in a 40% increase in test coverage and a 50% decrease in regression issues.
- Collaborated with cross-functional teams to identify key areas for improvement and integrated third-party tools, leading to a 30% reduction in system downtime.
- Collaborated with cross-functional teams to identify key pain points in the existing backend structure, leading to the successful implementation of solutions that improved overall user experience by 75%.
- Collaborated with cross-functional teams to streamline report generation processes, reducing time spent on manual tasks by 30%.
- Developed and integrated HTML-based features into the school management system, enhancing user experience and increasing page load speed by 40%, resulting in a 30% uptick in student engagement metrics over one academic term.

- Collaborated with a cross-functional team of developers and designers to enhance the school management system, resulting in a 40% improvement in user satisfaction scores based on beta testing feedback.
- Participated in code reviews and contributed to technical documentation, increasing overall project transparency and reducing onboarding time for new team members by 25%.
- Assisted in debugging and optimizing existing codebases through peer-review sessions, leading to a reduction in software bugs by over 50%, which enhanced overall system reliability.
- Participated in coding workshops focusing on front-end technologies such as HTML, CSS, and JavaScript, which elevated personal proficiency levels by 50% while contributing to a successful launch of two major updates that improved user engagement metrics by over 20%.
- Participated in weekly team workshops focused on Agile methodologies, contributing to a more efficient development process that led to a measurable 25% improvement in sprint delivery rates and increased stakeholder satisfaction.

EDUCATION

Jomo Kenyatta University of Agriculture and Techno

Nairobi, Kenya

Bachelor of Science in Information Technology

Graduation Date: Dec 2021

Moringa School

Nairobi, Kenya

Certification in Software Development

Graduation Date: May 2022

PROJECT EXPERIENCE

Kairop Ecommerce

Remote

Developer

- Developed an e-commerce platform enabling clients to browse products from various partners and place orders.
- Integrated payment processing systems with multiple partners, streamlining the checkout process and reducing transaction time by 20%.
- Developed a new automated system for admin approval of product listings, resulting in a 75% decrease in manual review time.
- Implemented continuous integration and continuous deployment processes for front-end on Cloudflare and back-end on Render, resulting in a 40% decrease in deployment time.
- Developed and deployed a user-friendly web application using React.js, Java Vert.x, and PostgreSQL, resulting in a 40% increase in user engagement metrics.

mTek Third-Party Web applications

Nairobi, Westlands

Developer

- Developed innovative mTek SaaS applications, incorporating cutting-edge technologies and user-centric design principles, resulting in a 30% increase in user engagement metrics.
- Utilized advanced coding techniques with React.js and Angular to optimize website performance, reducing loading times by 40%.
- Spearheaded the development of the Medical Web Application, which streamlined patient data processing, reducing average wait times and improving client satisfaction.

mTek Administrator Portal

Nairobi, Westlands

Developer

- Developed and maintained the Insurance Admin Portal, ensuring efficient management of client application traffic, policy purchases, and related activities.
- Developed and implemented a comprehensive user feedback system to gather input on new features, resulting in a 20% increase in user satisfaction levels.

- Identified key areas for improvement through user feedback analysis, leading to the successful integration of 10 new features that streamlined operations and increased overall customer satisfaction by 30%.

SKILLS & INTERESTS

- Skills:**
 - **Frontend:** Angular, React.js, Next.js, Nuxt.js, Vue.js, Tailwind CSS, TypeScript, HTML5, CSS3
 - **Backend:** Node.js, Nest.js, Django, PostgreSQL/MySQL, MongoDB
 - **DevOps:** AWS, Docker
 - **Tools:** Git (Version control), Figma (UI/UX design)
